### Detailed Itinerary

#### Day 01

#### Day 1. Arrival Ulaanbaatar

Upon arrival at the airport, you will be welcomed by our team. We will take you to your comfortable and conveniently located hotel. Ulaanbaatar is a modern city that is rapidly growing, with a population of over 1.3 million people. Depending on what time you arrive, we will arrange a city tour.

The city sightseeing tour includes a visit to the newly constructed Genghis Khan Museum, which happens to be the largest museum of the country. The museum houses a vast collection of over 8,300 artifacts that relate to the great Khans of the

Mongol Empire and the history of Mongolia from the Xiongnu era to the end of the 20th century. A substantial portion of these collected artifacts is displayed in nine exhibition halls.

One of the must-visit attractions in the city is Bogd Khan's Winter and Summer Palace. It is a series of stunning traditional buildings where the eighth Living Buddha and the last king lived. The palace has now been transformed into a museum where visitors can see fascinating artefacts and costumes associated with the last king, as well as a collection of stuffed animals.

Further we will stop at the Gandantegchinlen Monastery. It is the largest and most important monastery of Mongolia. We will scroll through the different monasteries and see the magnificent statue of Migjid Janraisig, an 82-foot-high statue gilded in gold and covered with silk cloths.

We'll finish the city trip with a view of Ulaanbaatar from Zaisan Hill. The city sightseeing tour takes about 4 – 5 hours.

The Altai Tavan Bogd is a 636,161-hectare pristine landscape that runs along the western frontier of the Bayan-Olgii aimag's Ulaan Khus, Tsengel, Sagsai, and Altai soums. In Mongolia's far west, the national park contains extremely high peaks with perpetual snow and glaciers. The peak of Khuiten Uul on the Altai Tvan Bogd range, which rises to 4374 meters above sea level, is the highest point. The park extends for over 200 kilometers from Russia to China, following the Altai Mountain Range that separates China, Russia, Mongolia, and Kazakhstan. The park contains tens of thousands of petroglyphs that are part of a UNESCO World Heritage Site. Numerous Turkic Stone Men and stone burial mounds can be found. The White River is one of many rivers that originate from the Tavan Bogd glaciers' melting ice.

We'll travel through the foothills of the mountains for 7 to 5 hours today, arriving in the early afternoon at the Tsagaan River Valley. The glaciers are situated between 3,500 and 4,000 meters above sea level. They are the source of the Tsagaan River and run for 16 kilometers.
