Buccaneer Cove, the "pirate cove". Indeed, it was a particularly popular bay for pirates to stock up on food, mainly turtles, and water. Today, sea lions and fur seals call it home. Erosion has sculpted the shores into the shape of an elephant.

Espumilla beach is a white sandy beach, where "scum" is particularly prevalent, hence its name. Behind the beach, mangroves and a small palo santo forest lead to saltwater lagoons that are home to pink flamingos. The high dunes are home to a nesting site for sea turtles.
